Bar Chart

Bar Chart

- **A bar chart represents data in rectangular bars with length of the bar proportional to the value of the variable**

Bar Chart

- **A bar chart represents data in rectangular bars with length of the bar proportional to the value of the variable**

- **R uses the function `barplot` to create bar charts**

Scatter Plot

▶ **Scatter plot is a graph in which the values of two variables are plotted along two axes**

Scatter Plot

- **Scatter plot is a graph in which the values of two variables are plotted along two axes**

- **The pattern of the resulting points reveals the correlation**

Summary

We have learnt how to:

- ▸ **Plot bar plot**
- ▸ **Plot scatter plot**
- ▸ **Find the correlation coefficient between two objects**

1. **Read the file** *moviesData.csv*
   Create a bar chart of *critics_score*
   for the first 10 movies

2. **Create a scatter plot of** *imdb_rating*
   and *imdb_num_votes* **to see their**
   relation

3. **Save both the plots**
